MARLIN JACKET

A wind- and waterproof jacket developed for work at sea. The material is 3L Gore-Tex Crosstech® laminate with a microgrid backing. The jacket protects against fluid-borne infections from both humans and animals, as well as chemicals such as gasoline, battery acid, firefighting foam, hydraulic oil, and chlorine. The Marlin Jacket has several functional details such as: an adjustable hood in fluorescent yellow with reflective elements for high visibility, a microphone holder, water-resistant zipper closures, spacious draining side pockets, and Cordura reinforcements on exposed areas.

FUNCTIONS

- Fixed and adjustable hood in fluorescent yellow for increased visibility
- The hood can be stored in the collar
- The hood's brim is stabilized to protect the face from wind and rain
- The collar is extra high at the back to protect the neck and throat
- Microphone holder on both left and right chest
- 2-way front zipper, covered by double storm flaps for extra waterproofing
- Draining, spacious side pockets with Velcro closure and access from both the top and the side
- Pre-shaped sleeves
- Velcro adjustment at sleeve ends
- Width adjustment at the back of the waist
- Hem width adjustment with hidden drawcords
- Cordura reinforcement on elbows
- Taped barrier on the inside of the hem and sleeve ends to prevent capillary absorption
- SOLAS-certified reflectors on hood, shoulders, sleeves, and storm flap
- Yellow reflectors on side pockets and lower back
- 3L Gore-Tex Crosstech with taped seams
